

YUMMY - Instructions

Contents: 106 Playing Cards (21x3, 20x4, 20x5, 24x6, 21x7).

Object of the Game: To collect as many cards as possible by creating sets.

Set Up: Shuffle all of the cards and deal them out evenly to the players. Depending on the number of people, some players may get an extra card, which will not effect the outcome of the game. Each player, without looking at his cards, puts them face down in a pile in front of them. Each player then draws the top three cards into their hand. Choose a player to start.

Play: The first player lays down one, two, or three cards face up in the middle of the table. He then replaces the cards he played with cards from his own pile so that he again has three cards in his hand. Play proceeds to the left.

Laying Down Cards: As the cards are played, they should be laid face up on the table. Cards with the same value are placed in a stack overlapping each other, 3's on 3's, 4's on 4's, etc. Make sure the cards are placed so that it is always clear how many cards are in each stack.

Creating Sets: A set is complete when the number of cards in the stack equals the value of the card. For example, if the third 3 is played on the stack of 3's, that constitutes a set. That player then removes the set from the middle of the table and puts it in his scoring pile to be counted at the end of the game. A new stack of 3's can be started by another player or the same player on his next turn.

Winning the Game: The game ends when one player has used all of his cards. The winner is the player who collected the most cards.
